

TRANSPORTATION

Although not directly tied in with the building, it is interesting to record and make aware of the transportation habits of the teachers and students. Some business and organizations actively promote their employees to walk or bicycle to work for transportation, recreation, exercise, and sport. Sometimes walking or biking isn't an option and so another idea is to promote carpooling. The idea behind this is enforces a social responsibility on employees giving them the opportunity to be active stewards of their personal and environmental health.

Being an elementary school most children at that age do not have the choice on the means of transportation to school. However, the teachers do. Have the teachers in the school fill out a short survey, and then plug the results into the Cool School Challenge under the "Transportation" tab.
