

## Organizing your Architectural Building Programming.

You have already planned majority of your building and the specific rooms inside of them so this short exercise is somewhat of a review. For externally large commercial projects, Architects may create a room schedule similar to the one shown below to help organize and focus on the needs of each individual space (room) of their building.

Using the excel document given fill out the document with information regarding your commercial building. Be sure you are descriptive and explain your ideas well. Even though you will be adjusting Colum widths, and adding rows, be sure the file project prints out well as a .pdf, as you will be putting it in your online portfolio. You also may want to change the font style to match your project.

Email me your completed excel file naming it  
**“ Your Last Name- ARCHITECTURAL BUILDING PROGRAMMING”**

I will check it in the computer and let you know if it’s good for your portfolio.

NAME OF SPACE					
DESIGNED BY:					
#	ROOM NAME	ROOM USAGE	AMOUNT OF SQUARE FEET REQUIRED FOR ROOM	HOW MANY OF THESE TYPES OF ROOMS REQUIRED THROUGHOUT BUILDING	SPECIAL CONSIDERATIONS FOR ROOM (EXAMPLE: PAINT SCHEME, LIGHTING, MATERIALS, SECURITY, SPECIFIC WINDOWS OR DOOR TYPES, 'FEELING' YOU WANT THE ROOM TO PORTRAY, ETC.)
