

ARCHITECTURAL HOME STYLES AND PLANS PRESENTATION

There are many different styles of homes, and different floor plans. It is fun to explore different house types and styles and find one (or two, or three...☺) that you like. Using the internet, look at different styles of homes, the materials used on them, types of windows, styles of doors, different floor plans, etc.

Create a [Google Presentation](#) to present to the class with at least the following information...

Title your presentation, **ARCHITECTURAL HOME STYLES- STUDENT FIRST NAME LAST NAME** and share it with me giving me permission to **CAN EDIT**

Slide 1: Title Slide, Include your name, hour and a title for the presentation.

Slides 2 thru 4?: House Elevations: Find pictures of house styles you like. Include at least **3** pictures of homes and write out specifically what you like about each house you have selected. Only put one picture per slide so it is large enough to see.

Slides 5? Thru 7?: Floor Plans: Find at least 3 floor plans you like. Write out specifically what you like about each floor plan.

Slide 8: Conclusion Slide. Write a short paragraph about the style of cottage you would like to design and what made you come to that decision.

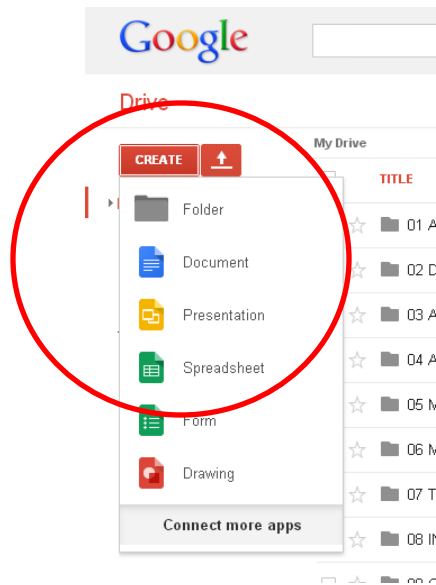

Remember this is the minimum, so if you find more pictures or examples you like, include them!

You will present your presentations in class so everyone can share what they have found.

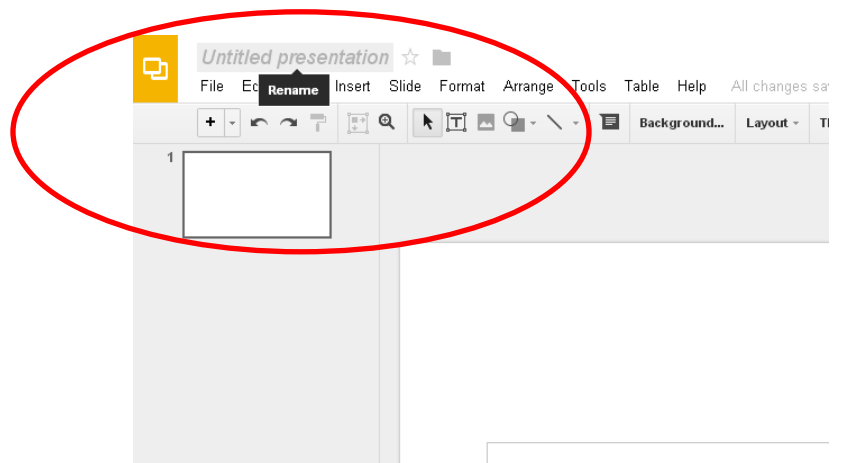

How to create a Google Presentation

Log into your Google Drive

Click on **Create**, then **Presentation**

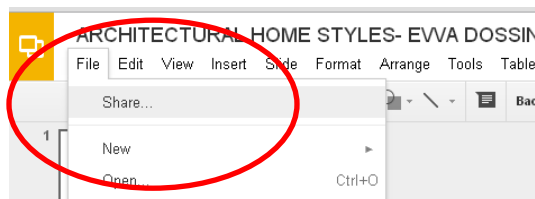

Once you open the Presentation, Click on the top where it says **Untitled Presentation** and rename the file **ARCHITECTURAL HOMES STYLES- YOUR FIRST NAME LAST NAME**

Go to File and Share

Share it with me allowing me to "CAN EDIT"

Click on Share & Save

Sharing settings

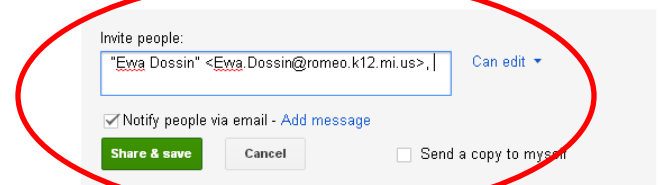

Link to share (only accessible by collaborators)
