

Basic Front Elevation Sketching

- From the pictures below, select two houses that you would like to sketch.
- Sketch each house on it's own 8.5x11 (*A-Size*) piece of paper.
- Your sketch should be relatively simple and take no longer than 10 minutes per house. Refer to the Basic Front Elevation examples shown.
- Sign and date each sketch at the bottom right hand corner.

These sketches will be included in your on-line portfolio. Feel free to do more sketches of additional houses to improve and diversify your work. Try sketching a real house such as your own or one you find interesting.
