

1. CREATE A "HATCH" FOLDER IN YOUR STUDENT FOLDER
2. DOWNLOAD THE HATCH PATTERN (it will be a .pat file) AND SAVE IT INTO YOUR "HATCH" FOLDER
3. THEN ADD THE PATTERN TO YOUR DRAWING BY FOLLOWING THE DIRECTIONS BELOW.

The **PAT file** must be in **AutoCAD's** search path. This can be any folder, simply add that folder to the search path using **OPTIONS** command > **Files** Tab > **Support File** Search Path. 5. You then find all of these new hatch patterns that you added under the **CUSTOM** option in **HATCH** command pop-up (or in the **Ribbon**). May 13, 2014

FYI:

\* .lin , is for line types
