

Introduction To Energy- Color Coded Notes

In the Introduction To Energy Lecture the main topics were discussed:

- Energy- What Is It?
- Alternative Vs. Renewable Energy
 - Forms of Energy: Potential
 - Forms of Energy: Kinetic
- Conservation of Energy
 - Energy Efficiency
 - Measuring Energy
 - Using Energy

In pairs, each pair having their own colored pieces of paper, write down a fact, definition, an example, or any other information you learned or know about the above topics. Write the Topic Category on the tope of the sheet of paper, followed by your fact. Tape your notes to the corresponding category on the large sheet of paper. Briefly review the notes together at the end with the entire class.
