

Commercial Stair Sections

You will draw a stair section for your commercial space. Due to the nature of our construction, it is very similar to the residential stair case you drew last year for your dream house.

1. Review the example stair section drawing given to you. You should notice that it looks very similar to the residential one you drew last year expect for a few differences.
 - a. The treads are 11-1/4" (*last year's residential was 10-1/4"*)
 - b. The minimum tread depth is 10" (*last year's residential was 9"*)
 - c. The maximum riser height is 7-3/4" (*last year's residential was 8-1/4"*)
2. Draft a stair section to reflect what you have in your live-work building. You will be inserting this at 1/2" = 1'-0" scale so use the correct dimension and note sizes. If you need a refresher on a stair section drawing, go to my website, ARCH 1 3.Dream House.... 14. Stair Section- [PDF](#) Stair Section and Reference Notes and [CAD](#) reference files. You can download the CAD file to help you get started.
3. Draw your stair section. Add notes and dimensions. Print off a check-set for review.
