

Tiny House Design

The tiny house movement is sweeping the nation. Although these homes are much smaller than your 800 square foot cottage, you can get some efficient use of space ideas from these homes. After viewing the short video, <http://abcn.ws/1oHeKBg> and doing additional research on the internet, answer the following questions.

1. What are they?
2. Why do people choose to live in them?
3. Would you personally want to live in a tiny house? Explain why or why not.
4. Research and list some interesting facts about tiny houses.
5. How does someone go about planning/ designing a tiny house?
6. What is the construction of a tiny house?
7. What are some interior design aspects of a tiny house that makes the square footage more useful?
8. Why are tiny homes often considered eco-friendly.
